

## Product Detail

## Usage

PlastiCorners is specifically engineered for stucco reinforcement at the corners of windows and doors. It helps reduce structural cracks in stucco that commonly originate from these locations. PlastiCorners is installed directly over building paper and one layer of lath. Scratch coat is then applied over product until it is embedded completely. Subsequent coats are applied as normal.

This product is intended for 7/8" stucco system only.

<b>Material</b>	Plastic
<b>Color</b>	White
<b>Packaging</b>	100 per box
